-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. The Applicant's Amendments and Accompanying Remarks, filed November 30, 2007, have been entered and have been carefully considered. Claims 1 – 10 are pending. The invention as currently claimed is not found to be patentable for reasons herein below.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 1 – 10 remain rejected under 35 U.S.C. 102(b) as being anticipated by Hobbs et al. (US 2002/0192449 A1). The details of the rejection can be found in paragraph 3 of the Office Action dated August 31, 2007. The rejection is maintained.

Response to Arguments

4. Applicant's arguments filed November 30, 2007 have been fully considered but they are not persuasive.
5. Applicant argues that the polyethylene glycol of Hobbs et al. cannot be equated to Applicant's "an organic compound having a plurality of hydroxyl groups". Applicant indicates in the arguments that although polyethylene glycol is an organic compound and has a plurality of hydroxy groups, the molecular weight of polyethylene glycol is substantially different between Hobbs and the present invention. Applicant additionally

indicates that the polyethylene glycol of Hobbs is not a "polymer". The Examiner respectfully argues the contrary. Claim 1 only requires "an organic compound having a plurality of hydroxyl groups" which Applicant agrees that polyethylene glycol is an organic compound and has a plurality of hydroxy groups. Claim 1 does not require a certain molecular weight, therefore, a particular molecular weight is not required by the claim. Furthermore, the pre-fix "poly" indicates a polymer. The Examiner submits that the polyethylene glycol, despite being used for void formation, is still considered to be a polymer. The Examiner submits that the invention of claim 1 is met. The arguments are not persuasive and the rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
